№ У-88/623-22

Executive Director of CER
Mr. Alberto Mazzola

CER CEOs

Dear colleagues!

Since 24 February 2022 all Ukrainian nation faced outstanding act of aggression that divided our life into before and after. For the last 10 days we had to see the most terrifying scenes of bombed cities, ruined homes, hospitals, schools and all the critical infrastructure. More than a million of civilians (women, children and elderly people) had to become refugees in order to survive and these flows continue. As a railway company each day we have to accept new challenges for maintaining the process to keep country alive and to provide people with possibility to move.

I want to take this opportunity on behalf of all Ukrainian nation and every one of our 260 thousands railway men staff to express our deepest appreciation to all of you, especially to neighboring countries and railway companies, for all the united actions and collaboration which is done in order to transport Ukrainian citizens to safe place (many companies providing it free of charge and I know how much it means for those in needs), to organize welcome places at stations, to transport and provide humanitarian aid both to those who moved abroad and to those millions who stay in Ukraine with no fear of war. I thank you for your support in maintenance that help us to operate even in such circumstances. I am proud to see how railway community is working and supporting us as one family without borders with no means of language only with one intention to help the one who is in need. We do appreciate all the sanction your governments support and you impose against Russian companies, as there is no higher value than human life and no price it can be estimated, any company involved in invasion process should feel the consequences of its activity.

I am sure that together and united we can stand it.

Stand with Ukraine!

Sincere

Chairman of the Management Board

Oleksandr KAMYSHIN
